

DHANUSH KUMAR NAGARAJAN

089 239 8085 | dknagarjan99@gmail.com | linkedin.com/in/dhanush-kumar-nagarajan

PROFESSIONAL SUMMARY

Data analyst with 5+ years' professional experience in data analysis, reporting and business analysis within a large global organisation, and an MSc in Data Analytics (TUS, completing 2026). Skilled in data extraction and querying (SQL), statistical analysis (R), and building dashboards and reports in Tableau, Power BI and advanced Excel to communicate key metrics and trends to technical and non-technical audiences. Strong track record of translating stakeholder requirements into reports and solutions, documenting data-governance and quality-check procedures, and delivering accurate, decision-ready analysis under deadline pressure. Motivated to apply these skills to sustainability and decarbonisation supporting institutional net-zero reporting, ranking submissions, and strategic planning.

CORE SKILLS

- Data Extraction & Querying:** SQL (complex joins, subqueries, window functions, aggregations), MySQL, MongoDB
- Statistical Analysis:** R (statistical analysis, predictive modelling, RStudio), Python (Pandas, data wrangling)
- Data Visualisation & BI:** Tableau (interactive dashboards, calculated fields, KPI storytelling), Power BI (reports, dashboards)
- Advanced Excel:** pivot tables, VLOOKUP, advanced formulas, trend analysis
- Reporting & Business Analysis:** regular, ad-hoc and statutory-style reporting; requirements gathering; process documentation; report writing; quantitative & qualitative analysis
- Data Management & Governance:** data accuracy & integrity, quality checks, governance procedures & documentation, confidential and ethical handling of sensitive data
- Communication & Stakeholder Engagement:** presenting complex data to technical and non-technical audiences (written and oral), stakeholder management, cross-functional collaboration
- Ways of Working:** managing multiple projects, prioritisation and meeting deadlines in fast-paced environments; effective both independently and as part of a team

RESEARCH, ANALYTICS & REPORTING PROJECTS

- Master's Thesis - Transformer-Based Fake News Detection (NLP & ML)

TUS | 2026

 - Conducted a full quantitative research study benchmarking transformer model (BERT, RoBERTa, DistilBERT) and large language models against traditional ML baselines, following the CRISP-DM methodology across multiple benchmark datasets.
 - Evaluated models rigorously using accuracy, precision, recall, F1, ROC-AUC and Matthews Correlation Coefficient, and documented methodology and findings clearly for a technical audience.
- Agriculture Sector BI Dashboard

Tableau | 2026

 - Built an interactive, end-to-end dashboard analysing crop production volumes, regional yield trends and sector KPIs presenting environmental and resource data through dynamic charts, filters and drill-down views.
 - Applied data-storytelling principles for a non-technical audience, enabling self-service insight and evidence-based recommendations.
- Business Insight Extraction via Relational Querying

MySQL | 2026

 - Wrote complex SQL (joins, subqueries, window functions, aggregations) against a normalised database to extract strategic reporting insights, documenting query logic and interpretation for non-technical stakeholders.
- Property Market Analysis & Statistical Modelling

R, RStudio | 2026

 - Delivered a full-cycle project (ingestion, cleansing, exploratory analysis, statistical modelling) to extract market insights and trends, with publication-quality visualisations framed in business context.
- Operational Database Design & Query Reporting

MongoDB | 2026

 - Designed a scalable NoSQL database of 1,000 documents modelling real-world entities; authored 20 retrieval queries and 10 aggregation pipelines for operational reporting, validating schema integrity in MongoDB Compass.

PROFESSIONAL EXPERIENCE

- Cognizant Technology Solutions

Nov 2021 - Jul 2025
Bangalore, India

Technical Lead (2023–2025) · Senior System Engineer (2022–2023) · System Engineer (2021–2022)

 - Progressed through three roles over nearly four years at a large global IT services organisation, taking on increasing ownership of data analysis, reporting, and automation.
 - Extracted and analysed large volumes of operational data using SQL and Excel to identify trends and anomalies, presenting findings with clear commentary and recommendations to technical teams and senior leadership.

- Designed and maintained reporting dashboards in ServiceNow and Excel tracking KPIs such as MTTR, SLA compliance, and backlog and produced regular and ad-hoc reports to support data-driven decision-making.
- Ensured data accuracy and integrity by implementing and documenting quality checks and governance procedures, handling sensitive data with strict confidentiality.
- Used Python to automate routine data and reporting tasks and communicated complex findings clearly to non-technical stakeholders.

Verticurl Marketing Pvt Ltd

Jan 2020 - May 2021

Marketing Technology Associate (2021) · Marketing Intern (2020)

Coimbatore, India

- Gathered and documented stakeholder requirements and translated them into reporting and automated campaign workflows in Marketo and Oracle Eloqua.
- Analysed campaign performance data open rates, click-through rates, and conversion funnels with Adobe Analytics, presenting insights and prioritised recommendations through clear visualisations.
- Cleansed and segmented data for targeting, and improved reporting quality and delivery timelines through data analysis and process mapping across teams.

EDUCATION

MSc in Data Analytics - Technological University of the Shannon (TUS)

2025 - 2026

Ireland · Completing 2026 · Thesis: Transformer-Based Fake News Detection using NLP & Machine Learning

BEng, Electronics & Communication Engineering - Anna University

2016 - 2020

India

CERTIFICATIONS, ACHIEVEMENTS & LEADERSHIP

- **Big Data Engineering Certification Trendy Tech Institute (2022):** 6-month programme in large-scale data processing, pipeline architecture and distributed analytics.
- **Student Global Ambassador TUS (2025 - Present):** represented the university and supported international students, leading multicultural campus events reflecting a strong awareness of and commitment to the equality, diversity and inclusion agenda.
- **Client Appreciation Award Cognizant (2023):** formal client recognition for excellence and responsiveness under high-pressure conditions.
